

Postdoctoral Positions in Medicinal Chemistry and Chemical Biology Harki Laboratory, University of Minnesota

The Harki laboratory (harki.umn.edu) at the University of Minnesota, Department of Medicinal Chemistry has immediate openings for at least three (3) Postdoctoral Research Associates. These positions are NIH-funded and the initial term of appointment is 1-year. Start dates are negotiable. Candidates for the Postdoctoral Position in Medicinal Chemistry should have expertise in organic synthesis with a desire to work on multiple concurrent projects associated with the hit-to-lead optimization of small molecule inhibitors. Candidates for the Postdoctoral Position in Chemical Biology should have expertise in medicinal chemistry, chemical biology, or biochemistry with a desire to work on projects associated with targeted protein degradation. Motivated applicants may apply by emailing Professor Harki (daharki@umn.edu) the following materials:

- (1) A current CV
- (2) A short statement of previous research experiences and postdoctoral research interests
- (3) The names and contact information for two references
